The Nimbus POS Brand

- Strategy
- Visual Overview

Our Goal

The goal of Nimbus POS' brand identity is to create a solid and bold look that connects with our target audience and amplifies confidence. Every element reflects control, confidence, calm and stability.

Why Do We Exist?

Nimbus POS exists to unify selling, inventory, purchasing, staff roles, and reporting in one system to replace fragmented tools (paper, WhatsApp, Excel, disconnected POS apps) with a single source of truth.

What Sets Us Apart?

Where competitors force operators to stitch tools together or trade off depth for simplicity, we stand apart by unifying selling, inventory, procurement, staff, and reporting into one connected system

Who Do We Serve?

We serve restaurant, bar, cafe, quick-service, small hotel, and stock-heavy retail shop owners, along with branch managers, cashiers, kitchen staff, procurement and stock teams, and accountants. Our focus is on providing value to businesses ranging from a single location to growing multi-branch chains.

Where Are We Headed?

Our vision is to become the backbone for hospitality and retail businesses as they grow - being the single source of truth operators rely on as they scale from one location to another.

What Do We Stand For?

We stand for reliability, stability, operational clarity, clean auditable data, simplicity at speed and minimalism. These values guide everything we do, from our offerings to how we engage with our users.

Strategy

The Problem We Feel

Running a business can feel chaotic - orders piling up, inventory falling out of sync, staff pulled in five directions, customers waiting at the register while the system lags behind. Nimbus POS exists to give owners back a sense of control over that chaos.

The Value Behind The Wheel

So we asked a simple question: what does '**in control**' physically look like? And no we didn't want a mere symbol with no meaning and connection like a settings icon or power button. We looked for something that could evoke an emotion, because where there is emotion there is connection and where there is connection, there is trust.

That's why we landed on the **steering wheel**, the one everyday object that lets you feel control **in your hands**.

It's the one object almost everyone has personally held while actively making decisions; left or right, faster or slower, in this direction or that. That made it the **right foundation** for a system where the owner is meant to feel like they're the one **steering** the business, not the one being steered by it."

Visual Overview

The “Visual Overview” section serves as a comprehensive guide consolidating all the key graphic elements that comprise the distinct visual identity of the Nimbus POS brand. This section provides a holistic understanding of the visual elements that bring the Nimbus POS brand to life.

The Wordmark & Icon

- Logomark in Action

Our Wordmark

The Nimbus POS wordmark is a key element of the brand's visual identity. Designed to be clean and solid, it reflects the brand's core values of stability, clarity, simplicity and minimalism.

The wordmark is intended to be highly legible across all mediums, from digital screens to printed materials, ensuring consistent brand recognition.

It's typography conveys professionalism and trust reinforcing the brand's message at every touchpoint.

Nimbus_{POS}

Wordmark Variations

To ensure versatility and consistency, we've developed 2 wordmark variations for Nimbus POS.

These variations allow for flexible use across different mediums and sizes while maintaining the integrity of the brand identity.

Nimbus_{POS}

Nimbus
POS

Our Logomark

The Nimbus POS logomark draws its form from the steering wheel. Its shape is deliberately solid and grounded, echoing the sense of stability and calm the brand promises to every operator who uses it.

At the same time, the mark is refined into a crisp, sharp, geometric form that signals a modern tech company rather than a literal object, positioning Nimbus POS as a serious, forward-looking software platform, not just a tool.

This logomark sends the same message as the wordmark through form.

It is a symbol of being in the driver's seat of your own business, steering rather than being steered, it is built with the precision and edge expected of a modern tech brand.

Simplified and abstracted rather than literal.

It's built to remain legible and recognizable at any size, from a favicon to a storefront sign while staying rooted in the same emotional idea that gives the brand its foundation.

Logo In Action

Whether our logo is displayed on packaging, digital platforms or printed materials, it consistently communicates professionalism, minimalism, calm and simplicity, ensuring brand recognition and impact across all touchpoints.

Color Selection

Color Selections

Nimbus POS brand’s color palette (navy and white) was kept because they echo the brand’s core values of control, stability and trust.

Light grey and dark grey act as supporting accents reinforcing the premium, minimal feel the brand stands for while keeping the overall look clean, calm and controlled.

This palette ensures Nimbus POS feels like a dependable system users can trust at every touchpoint.

Choice

Primary Type

We kept Inter because like the primary colors (navy and white), it embodies the brand’s core values of clarity, stability and control. It is clean, geometric and has consistent proportions.

Unlike brands that rely on multiple typefaces, we kept Inter as the only type family to reinforce simplicity.
